

AMENDMENTS TO THE CLAIMS

The listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims

Claims 1 - 6 (Cancelled)

7. (Currently Amended) A digital camera which records an image of each frame captured by an imaging device and information of number of prints to be produced from each frame in a recording medium, said information being referred to when said image is printed, said digital camera comprising:

an each-frame print number setting device configured to set the number of prints for each frame image recorded in said recording medium; and

an all-frame print number setting device that configured to collectively sets set the numbers of prints for the images of all the frames recorded in said recording medium, wherein

when actuated, said all-frame print number setting device sets, in the recording medium, the recorded numbers of prints for the images of all the frames to one, including frames that had recorded numbers of prints previously set to zero and frames that had recorded numbers of prints previously set to one or more via said each-frame print number setting device.

Claims 8 - 9 (Cancelled)

10. (Currently Amended) ~~The A digital camera as defined in claim 7,~~ further comprising:

an each-frame print number setting device ~~that sets~~ configured to set the number of prints for each frame image recorded in said recording medium;; and

an all-frame print number setting device configured to collectively set the numbers of prints for the images of all the frames recorded in said recording medium,

wherein

when actuated, said all-frame print number setting device sets, in the recording medium, the recorded numbers of prints for the images of frames that had recorded numbers of prints previously set to zero to one, only for frames whose numbers of prints have been zero leaving the frames that had recorded numbers of prints previously set to one or more, via said each-frame print number setting device, as currently set.

11. (Currently Amended) ~~The A digital camera as defined in claim 7,~~ further comprising:

an each-frame print number setting device ~~that sets~~ configured to set the number of prints for each frame image recorded in said recording medium;; and

an all-frame print number setting device configured to collectively set the numbers of prints for the images of all the frames recorded in said recording medium,

wherein

when actuated, said all-frame print number setting device increases, in the recording medium, the recorded numbers of prints for each frame set by said each-frame print number setting device by one for images of all frames recorded in the recording medium by one, including frames that had recorded numbers of prints previously set to zero or more, via said each-frame print number setting device.

12. (Currently Amended) The A digital camera as defined in claim 7, comprising:
an each-frame print number setting device configured to set the number of prints for each frame image recorded in said recording medium; and

an all-frame print number setting device configured to collectively set the numbers of prints for the images of all the frames recorded in said recording medium,
wherein

when actuated, said all-frame print number setting device searches for an image file of a frame having been undesignated all frames that have not been designated for printing among all the frames recorded in said recording medium, and sets the number of prints for the image of the frame having been undesignated said all frames that have not been designated for printing to one.

13. (Previously Presented) The digital camera as defined in claim 7, further comprising a printing information recording device that records the information of the numbers of prints set by said all-frame print number setting device in said recording medium.
